## Veterinary Report

### 2019 Bewitchment (No Nay Never/Bewitchment) 7 mths Bay Thoroughbred Filly

Radiographs taken on the 12<sup>th</sup> November 2019 have been viewed and abnormalities graded as low to medium risk. These include a slight shadow to the lateral femoral trochlear ridge of the L stifle.

On endoscopic examination the larynx was graded 2A, with occasional asynchronous movement but full abduction easily achieved and maintained.
