Tattersalls October Yearling Sale Book 3

Re: Lot no 1403: Kameko x Cross Pattee – 2024 B.C

This is to certify that I have examined the eyes, the heart at rest, the testicles and auscultated the lungs of the colt described above.

The colt has a faint corneal opacity at the site of a previous superficial ulcer on the left cornea. This does not affect vision and should become less dense with time.

No other clinically significant abnormalities were detected.
