**Goffs Premier Yearling Sale 2025**

**Re: Lot no 405: Zoustar x Time Scale – 2024 B.C.**

This is to certify that I have examined the eyes, the heart at rest, the testicles and auscultated the lungs of the colt described above.

The colt has subtle corneal scarring (opacity) of the left eye. This was due to corneal ulceration as a foal. The scarring has reduced in size and density since treatment was concluded and should continue to improve with time. The yearling has received no treatment for the eye in over a year. The corneal scarring is not considered to impair vision. The remainder of the ocular examination and examination of the structures described above was normal.
