26th November 2019

Tattersalls December Foal Sale 2019

Tweenhills Farm & Stud

Lot 1025 - Frankel X Simple Verse - Bay Colt

Radiographic Grade: Low to Medium

Radiograph Findings: Fragmentation of the proximal sagittal ridge on left (3-4mm) and right (1-2mm) front fetlocks. Easy to remove and with good prognosis afterwards surgery is required.

Should you require any more information please do not hesitate to contact me on the above mention address.

Antony Clements BVSc, MRCVS

'LOW RISK': Most animals with similar findings can perform the expected task with minimal or no veterinary intervention. Radiographic findings are unlikely to be significant.

'MEDIUM RISK': Some animals with similar findings are likely to require a degree of veterinary intervention to perform the required task.

'HIGH RISK': Animals with these findings are unlikely to be able to perform the required task despite veterinary intervention.

Radiographs were taken by Three Counties Equine Hospital on 11th and 12th November 2019.
